

Obtaining Gemini API Key

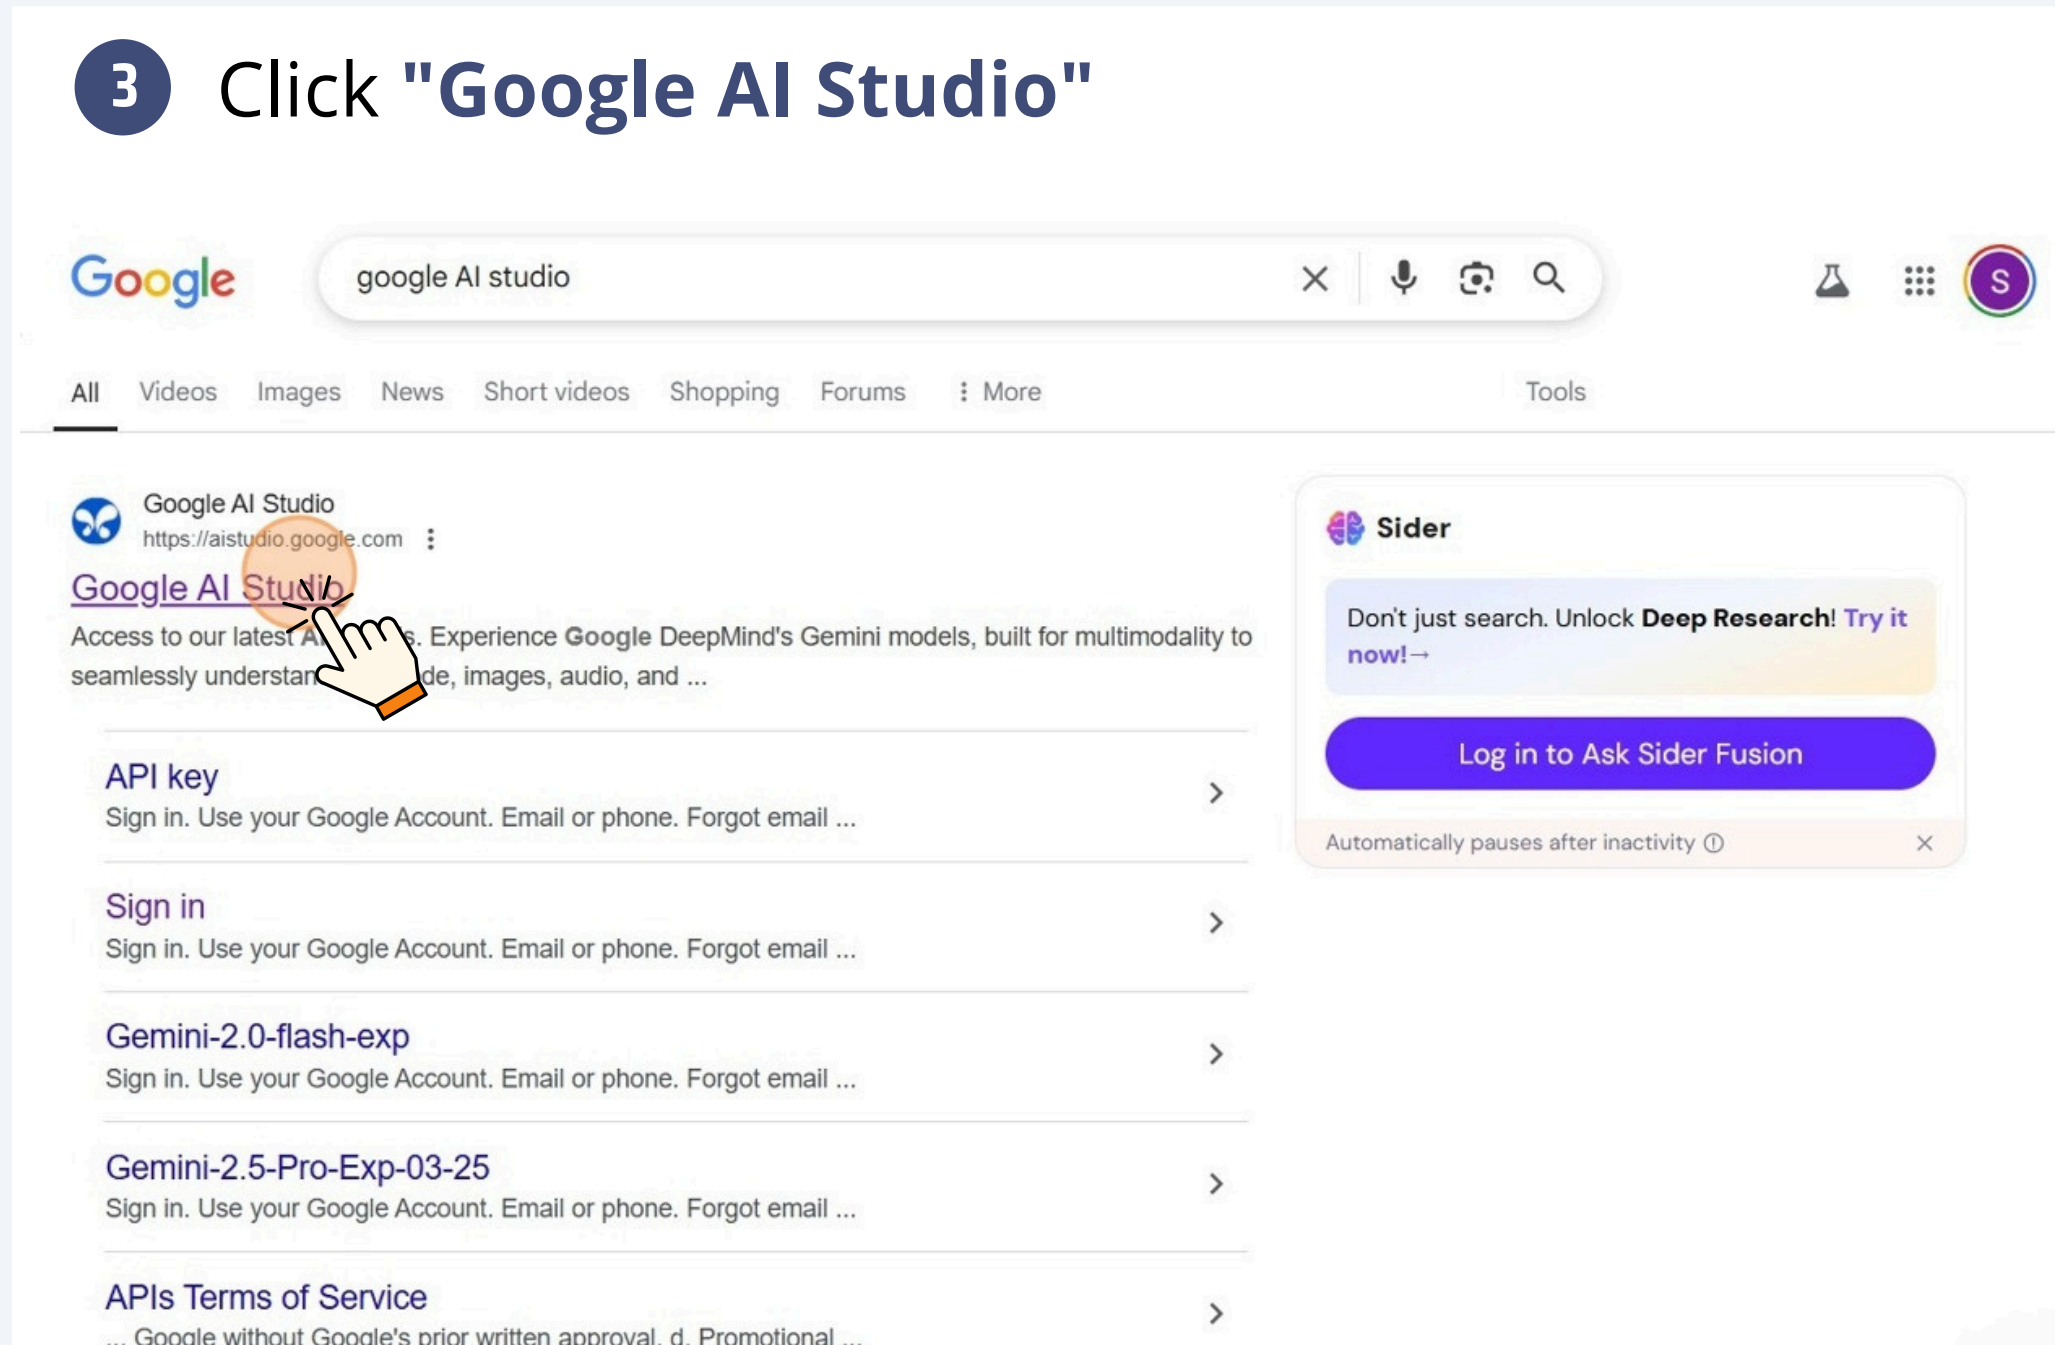

1 Navigate to <https://www.google.com/>

2 Type "Google AI Studio"

3 Click "Google AI Studio"

4 Click "Get API key"

The screenshot shows the Google AI Studio web interface. In the top right corner, there is a navigation bar with links for 'Studio', 'Dashboard', and 'Documentation'. A 'Get API key' button, represented by a key icon, is highlighted with an orange circle and a hand cursor pointing at it. Below the navigation bar, the main content area is divided into three sections. On the left is a sidebar with options: 'Chat', 'Stream', 'Generate Media', 'Starter Apps', and 'History'. The center section features a 'Chat Prompt' area with a large 'Welcome to AI Studio' message and a text input field containing 'Generate a collection of elementary math w...'. Below this is a 'What's new' section with two cards: 'Native image generation' (interleaved text-and-image generation with Gemini 2.0 Flash) and 'Grounding with Google Search' (generate current, verifiable responses from Gemini using Google Search). On the right is a 'Run settings' panel with a dropdown menu set to 'Gemini 2.5 Pro Preview 05-06', a 'Token count' of '0 / 1,048,576', a 'Temperature' slider set to '1', and a 'Tools' section with toggle switches for 'Structured output', 'Code execution', 'Function calling', and 'Grounding with Google Search'. At the bottom of the 'Run settings' panel is an 'Advanced settings' dropdown.

5 Click "Create API key"

API Keys

Quickly test the Gemini API

[API quickstart guide](#)

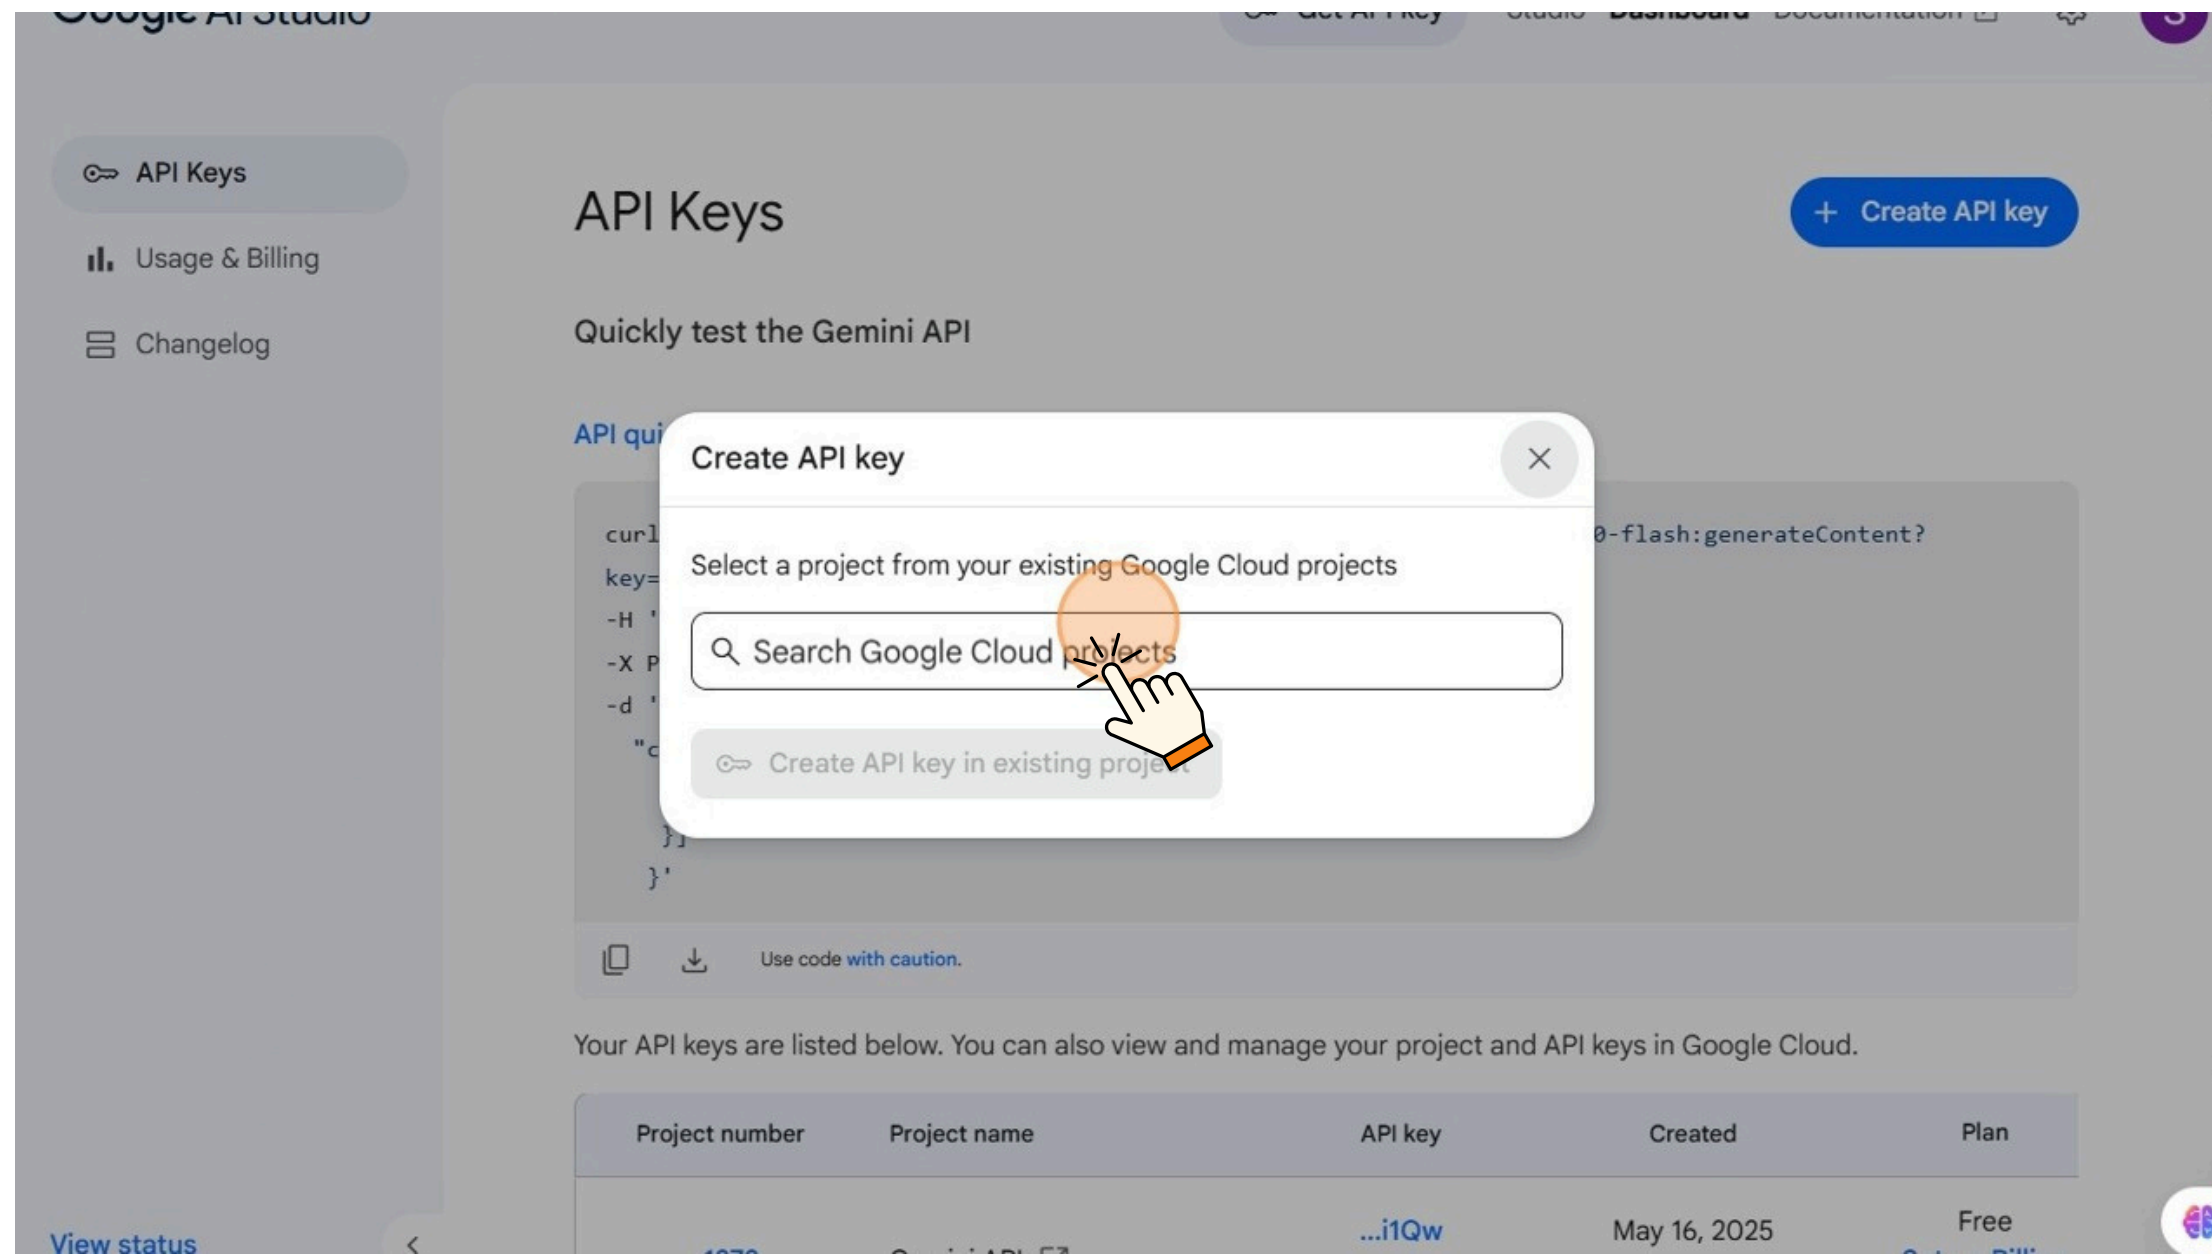

```
curl "https://generativelanguage.googleapis.com/v1beta/models/gemini-2.0-flash:generateContent?
key=GEMINI_API_KEY" \
-H 'Content-Type: application/json' \
-X POST \
-d '{
  "contents": [{
    "parts":[{"text": "Explain how AI works"}]}
  ]}'
```

Use code with caution.

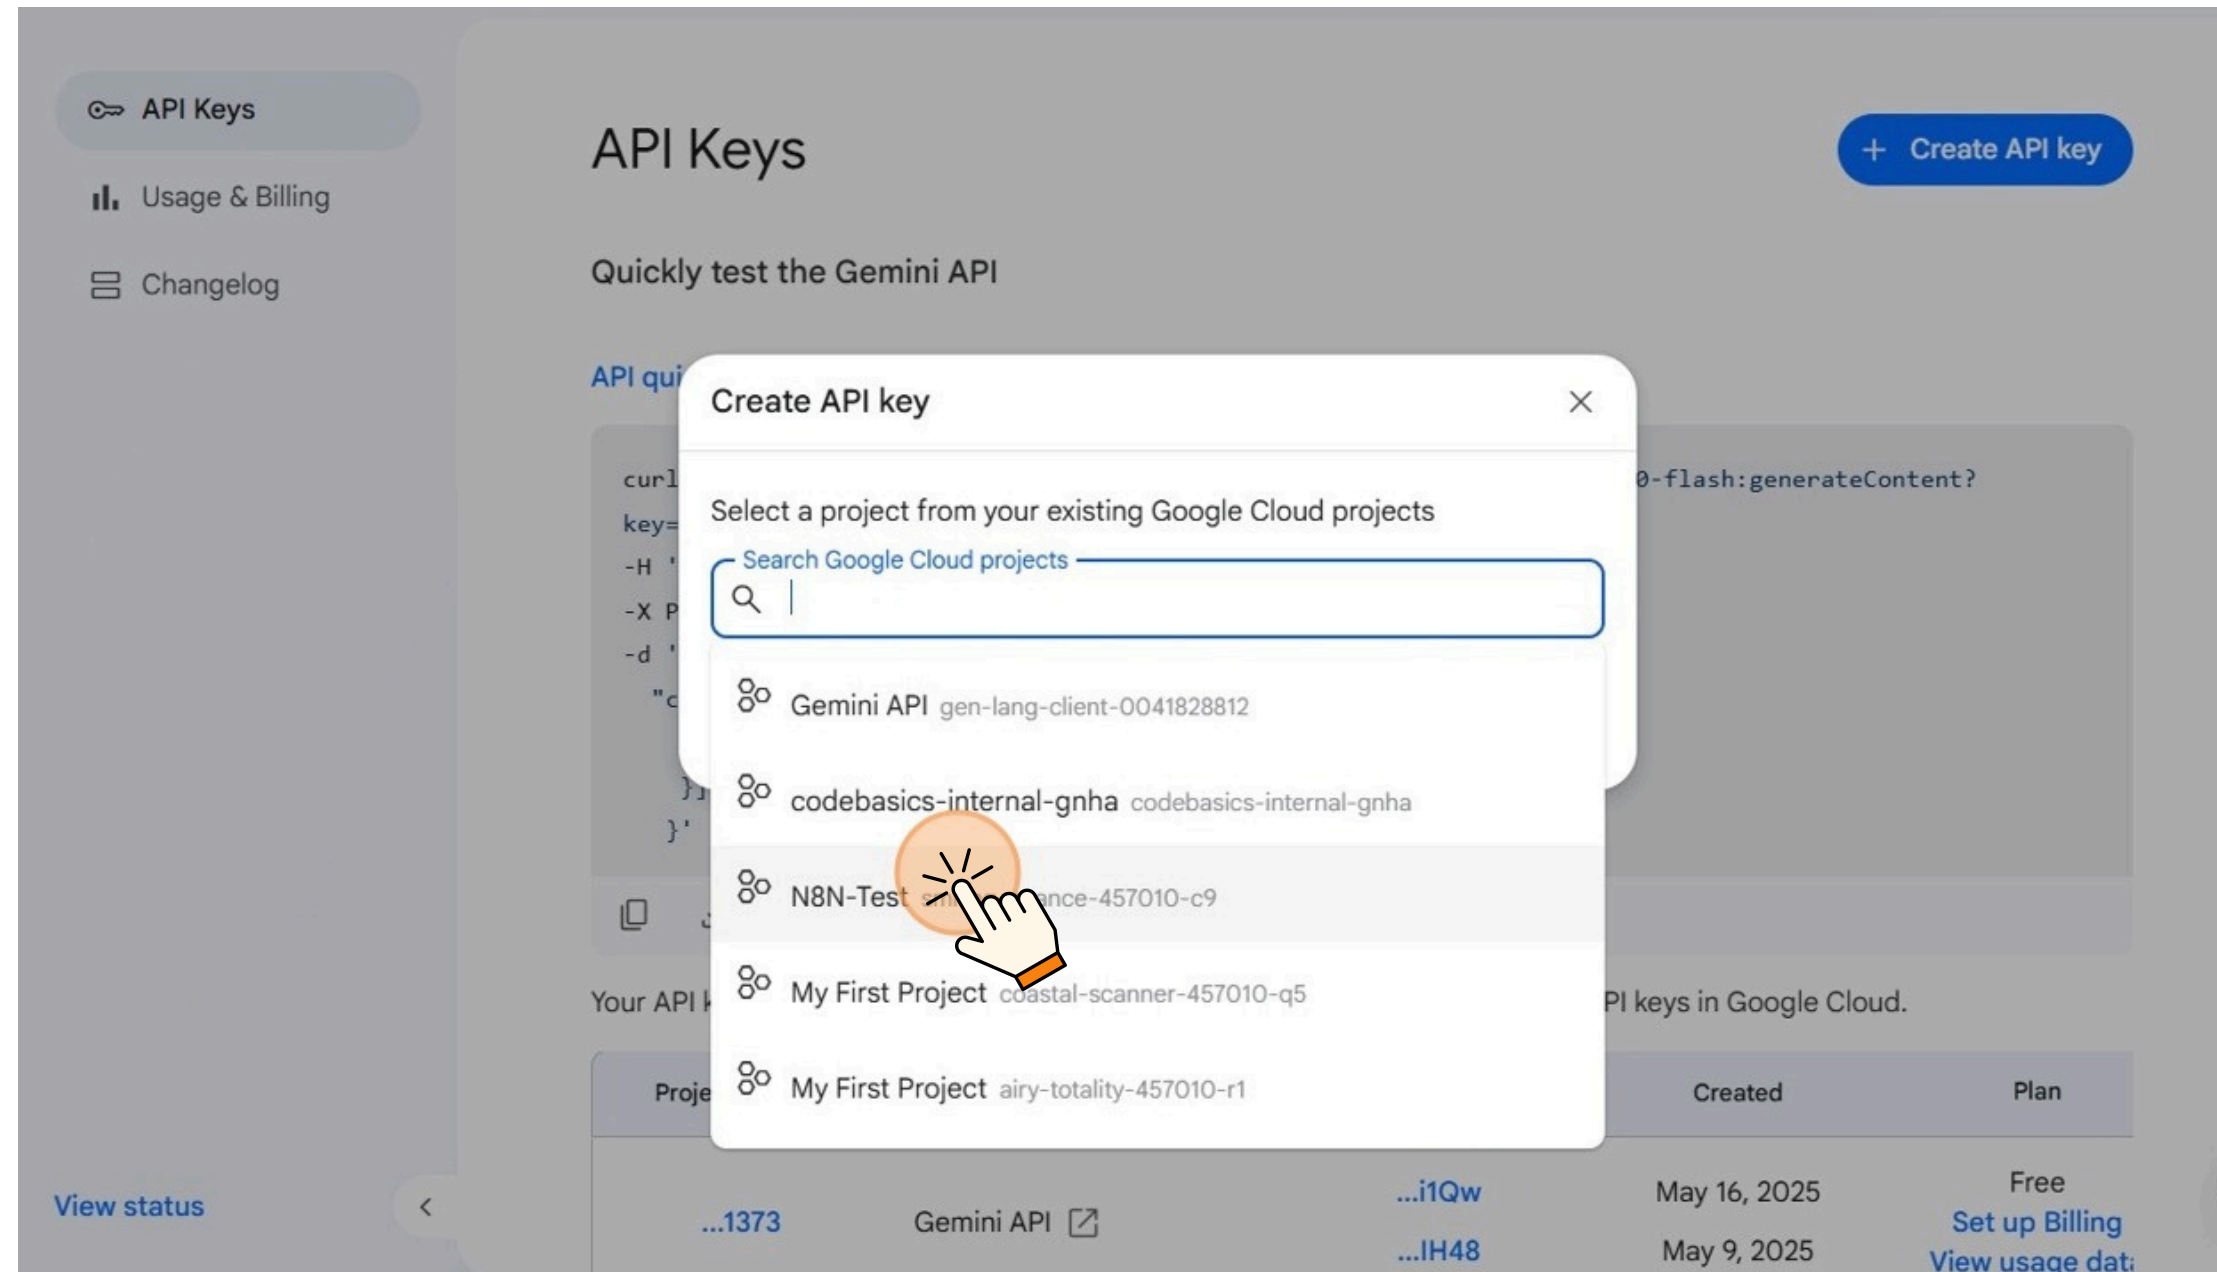

Your API keys are listed below. You can also view and manage your project and API keys in Google Cloud.

Project number	Project name	API key	Created	Plan
----------------	--------------	---------	---------	------

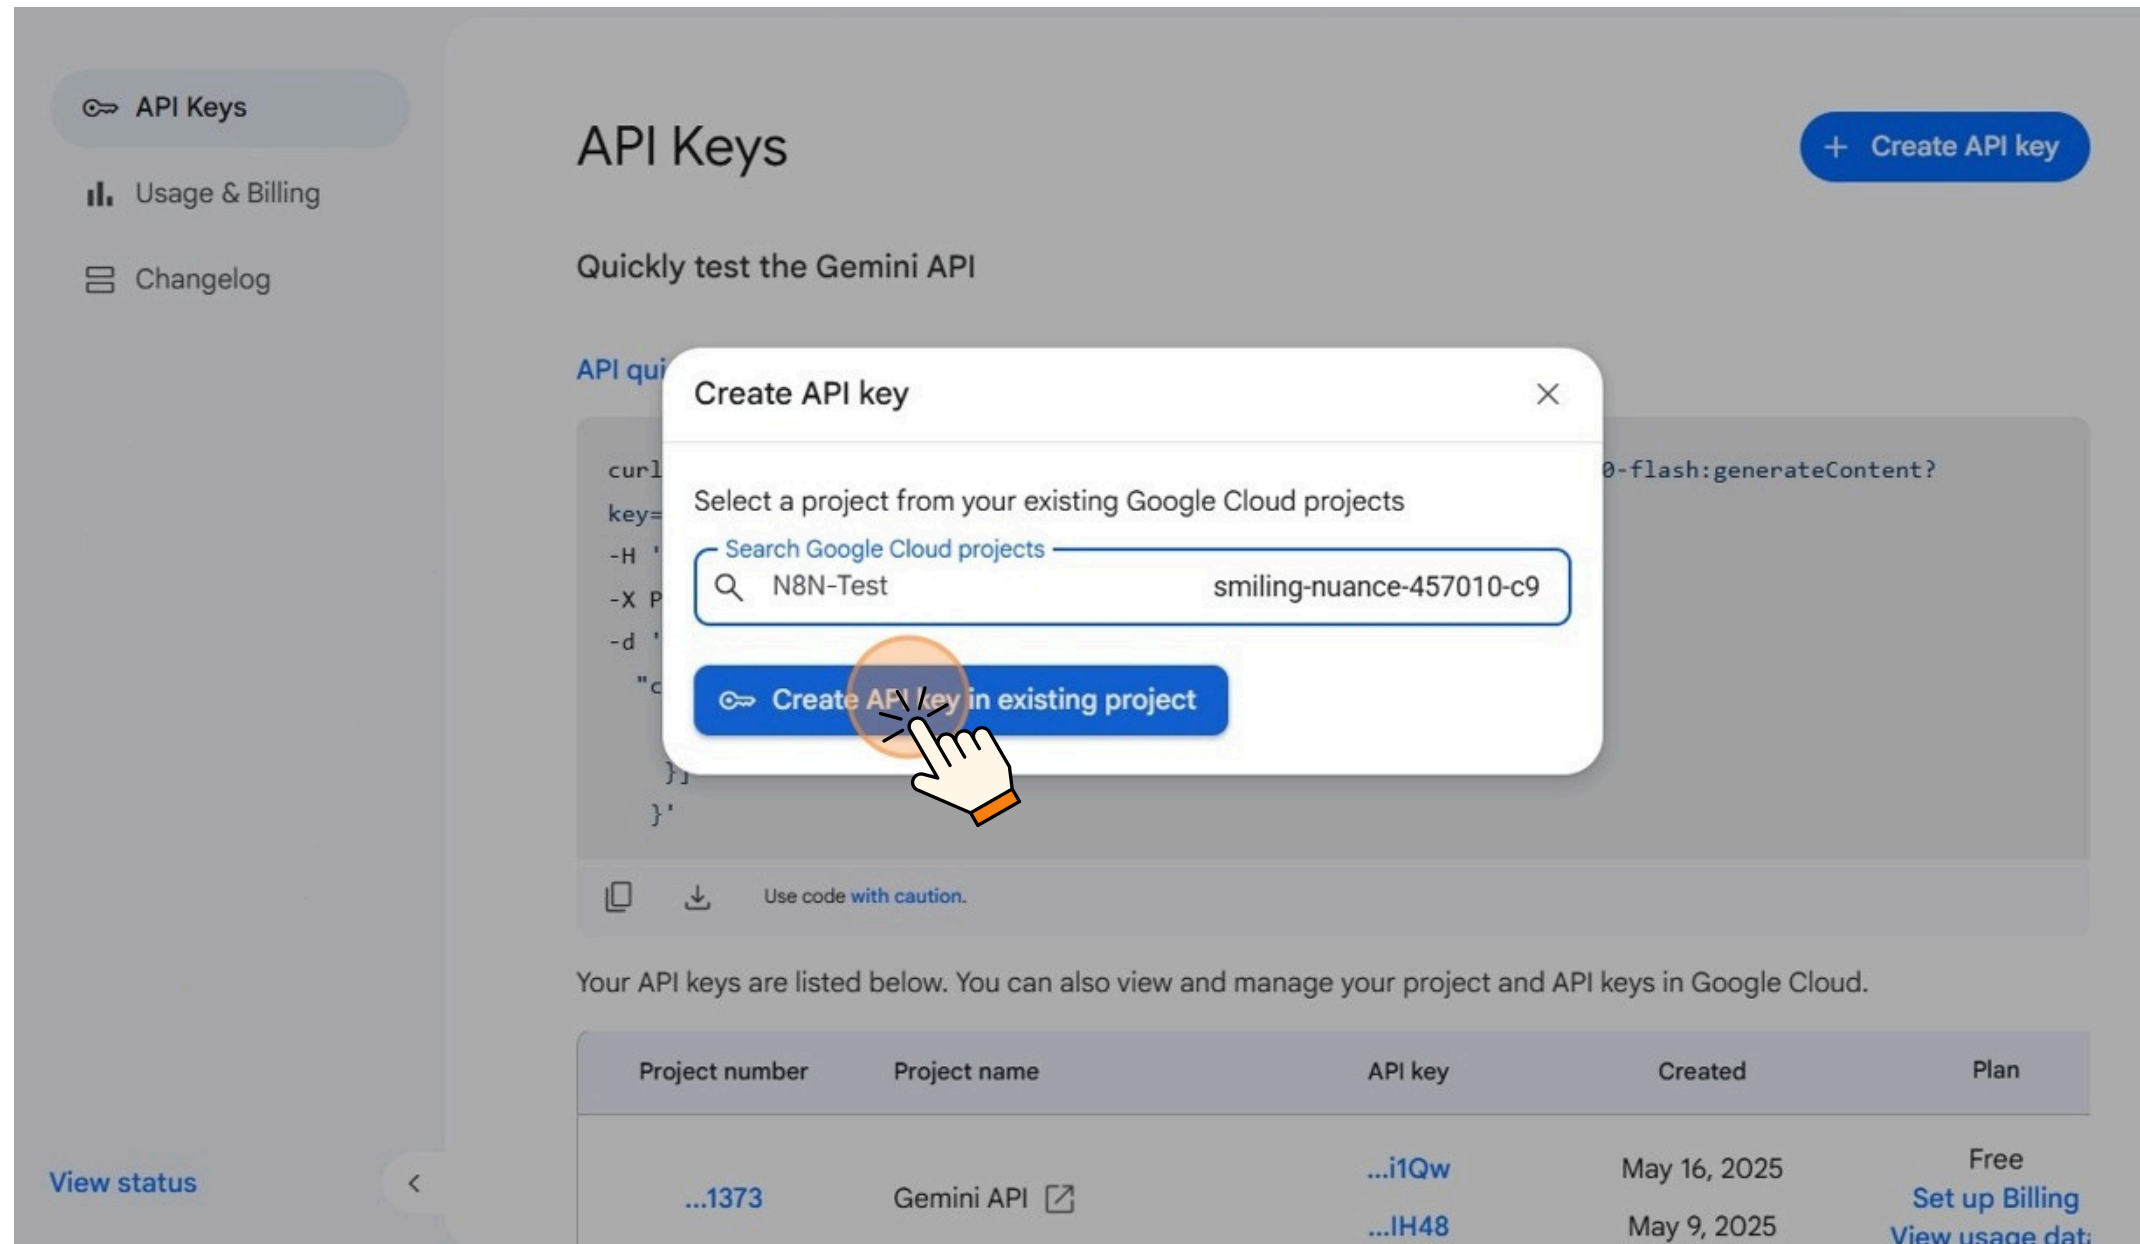

6 Click "Search Google Cloud projects"

7 Click "Choose a Project that you created in Google Cloud"

8 Click "Create API key in Existing Project"

The screenshot shows the Google Cloud API Keys management page. A modal dialog titled "Create API key" is open, prompting the user to "Select a project from your existing Google Cloud projects". The dialog includes a search bar with "N8N-Test" entered and a dropdown showing "smiling-nuance-457010-c9". A blue button labeled "Create API key in existing project" is highlighted with a hand icon.

Quickly test the Gemini API

API quickstart

```
curl -X GET \
  -H "Authorization: Bearer <API key>" \
  -X POST \
  -d '{"prompt": "Hello, world!"}' \
  https://generativelanguage.googleapis.com/v1beta1/models/gemini-1.0-flash:generateContent?
```

Use code with caution.

Your API keys are listed below. You can also view and manage your project and API keys in Google Cloud.

Project number	Project name	API key	Created	Plan
...1373	Gemini API	...i1Qw ...IH48	May 16, 2025 May 9, 2025	Free Set up Billing View usage data

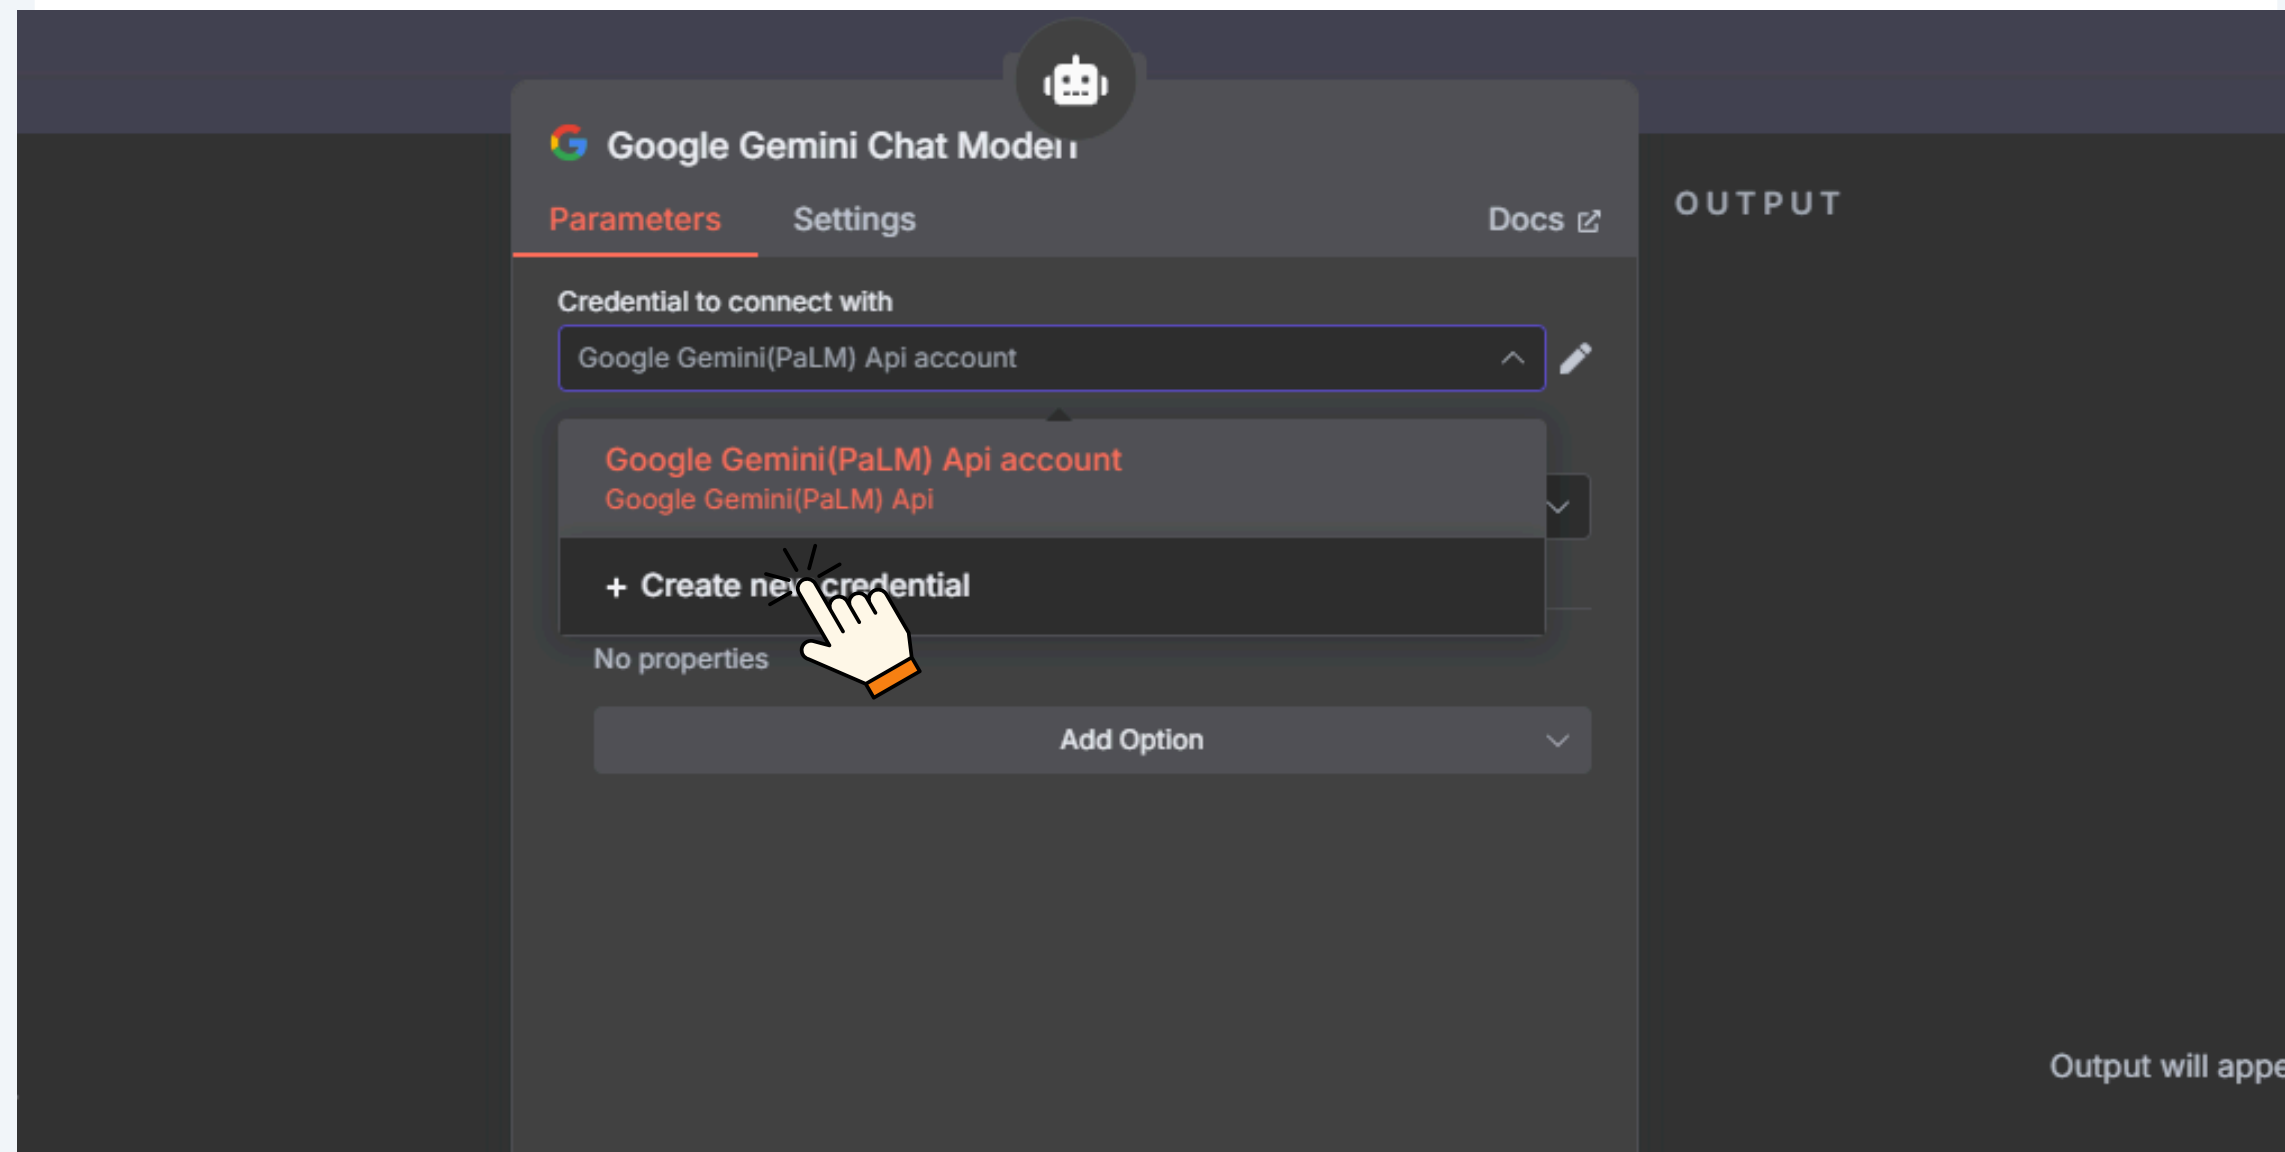

9 Click "Copy"

The screenshot shows the Google Cloud 'API Keys' management page. A modal window titled 'API key generated' is open, displaying a warning: 'Use your API keys securely. Do not share them or embed them in code the public can view.' Below the warning is a text box containing the API key: 'AIzaSyD9S7FYVV12Dp6Lkm5boZdGa6j9RSSnqWo'. A blue 'Copy' button with a document icon is positioned to the right of the text box. A hand icon with a pointing finger is clicking the 'Copy' button. The background shows the 'API Keys' sidebar with options for 'API Keys', 'Usage & Billing', and 'Changelog'. The main content area includes a 'Create API key' button, a 'Quickly test the Gemini API' section with a 'API quickstart guide' link, and a table of existing API keys.

Project number	Project name	API key	Created	Plan

10 Switch To The Tab “n8n”

11 Add the Gemini node in n8n - Click “**Create New Credentials**”

12 Paste "The API in the API Key Field and Save"

The screenshot shows a configuration window for a Google Gemini(PaLM) API account. The window has a title bar with a trash icon, a 'Save' button, and a close icon. The main content area is divided into sections: 'Connection' (with a help link), 'Sharing' (with an 'Ask Assistant' button), and 'Details'. The 'Details' section contains a 'Host' field with the value 'https://generativelanguage.googleapis.com' and an 'API Key' field with a masked value. A 'Fixed Expression' dropdown is next to the API Key field. A warning message at the bottom right states: 'Problem in node 'AI Agent'. A Chat Model sub-node must be connected and enabled'. The background shows a workflow editor with a list of variables on the left and a canvas with a node labeled 'AI Agent'.
